BOOK SYNOPSIS

This full-color atlas is a practical, step-by-step guide to the reconstruction of periocular defects following tumor excision or tissue-loss trauma. The book addresses the specific anatomic concerns in each oculofacial sector with tailored surgical principles and techniques designed to improve aesthetic outcomes. Full-color illustrations with detailed explanatory legends depict each step of each surgical technique. Flap design and mobilization are shown directly on surgical photographs, rather than in idealized drawings. The clear, accessible writing style will appeal to ophthalmic and plastic surgeons, non-ophthalmic surgeons, and non-surgical ophthalmic specialists. A companion Website will include an online image bank.
